SUMMARY

Motivated and detail-oriented B.Tech student in Computer Science and Engineering (AI & ML) with a strong foundation in programming, data analytics, web development, and machine learning. Eager to apply problem-solving skills and technical knowledge to develop innovative solutions and contribute to real-world projects.

EDUCATION

Kakinada Institute Of Engineering And Technology For Women

B.Tech CSE (AI & ML) - CSM

Year: 2024-2028

Current CGPA: 8.13

PROJECTS

Iris Flower Classification

Built a machine learning model to classify Iris flowers into different species using dataset. Performed data preprocessing, trained the model using classification algorithms and achieved high accuracy. Technologies Used: Python, ML, VS Code

Restaurant Menu Page

Designed and developed a responsive restaurant menu webpage showcasing various food items with categories, images and prices. Technologies Used: HTML, CSS

Metro Tickets Booking Page

Created a metro ticket booking webpage with user-friendly interface to select stations, view fares and book tickets. Technologies Used: HTML, CSS

3D Racing Game with Physics Engine

Developed a 3D racing game with realistic physics including car movement, collisions and track environment. Technologies Used: Python

WorkSense AI

Built a full-stack AI-powered employee productivity platform featuring meeting summarization, task extraction, and analytics dashboards. Technologies used: Python, Flask, HTML, CSS, JavaScript, and SQLite to improve workplace efficiency and collaboration.

INTERNSHIP

- Worked as Intern at Indian Institute of Science (IISc), Bangalore for 2 months. Gained hands-on experience and exposure to real-world technologies and research environment.

ACHIEVEMENTS

- Working as team lead for our team at my college, handling coordination tasks, guiding team members and ensuring successful completion of projects.
